

Kittycoin Token Whitepaper

Website: <https://www.kittycointoken.com/>

Video Manifesto: <https://www.kittycointoken.com/kittycoin-video/>

Abstract:

Introducing the “Kittycoin Token” - a peer to peer cryptocurrency with a focus on supporting philanthropy and encouraging mainstream cryptocurrency adoption.

- **Kittycoin is built to help raise money to support Animal Shelters & Rescues.**

One of the things that makes Kittycoin different from every other currency in the world, is the fact that 10% of the total newly released Kittycoin Token supply goes directly to support user voted upon no-kill animal shelters and rescues.

Whether it be to help local abandoned puppies and kittens in a shelter find a good home, or help endangered species in a wildlife reserve... Kittycoin is here to help.

Any user of Kittycoin can participate in a democratic voting process to determine which causes are supported through Kittycoin token donations.

- **Kittycoin solves the “pay to use” problem presented by other cryptocurrencies.**

The cryptocurrency revolution has undeniably brought about a huge amount of technological and financial progress over the past decade

That stated, one weakness of 99% of existing cryptocurrency and blockchain projects that exist currently on the market is that in order for users to use them they must first pay money to buy the token.

This creates a significant barrier of entry for encouraging mainstream user adoption. Not everyone has the money or the willingness to go out and buy cryptocurrency directly, especially when they are new to the technology.

If you look at a list of the most successful internet companies today, including the likes of; Google, Facebook, Snapchat, TikTok and Twitter, you will notice that almost all of these companies offer free on-boarding of users. It is safe to say these companies would not have achieved anywhere near the level of success that they have, if they charged users upfront to use their website.

Kittycoin aims to solve this “pay to use” problem within the cryptocurrency industry by distributing 40% of its total newly issued currency supply to airdrop kittycoins to new users. We believe the value of any given currency network is ultimately in its user-base. A currency network that onboards millions of new users is bound to grow in value overtime and can be successfully monetized without making users “pay to join”.

At the moment new users of Kittycoin who signup for our airdrop are granted 1,000 free coins. This amount will decrease overtime all the way down to a projected 5 new coins per unique user due to Kittycoin’s strictly limited supply. So the earlier on an individual free claims their Kittycoins, the more that they will receive. This helps reward early adopters and encourage users to signup right away.

- **Kittycoin rewards users for spreading the word to their friends, family and followers.**

In addition to the “pay to use” problem most existing cryptocurrency projects present, the fact that cryptocurrencies are decentralized in their nature presents a secondary

problem known as the “Tragedy of the Commons”. Since cryptocurrencies don’t have centralized companies at the center of them like typical corporations do, it is typically hard to successfully run an advertising campaign. The reason why advertising to acquire new users can be challenging is because cryptocurrencies are setup in a way where usually no single user controls a large enough piece of the coin supply to make advertising generate a profitable ROI on their investment. This means that many times nobody is running advertising to onboard new users within the project.

Kittycoin attempts to solve this problem through the implementation of a built-in referral / affiliate marketing program. When you successfully refer new users to free claim kittycoins, you are paid up to 1,000 Kittycoins per referral . Refer just 100 unique users and you could become a Kittycoin millionaire!

Kittycoin aims to bring the affiliate marketing model successfully used by companies like Amazon to the cryptocurrency space. This will enable the rapid on-boarding of new users, far greater than the efforts of one single entity or person ever could.

- **Kittycoin makes “coin mining” accessible to anyone in the World with a PC, no specialized or expensive mining equipment (which burns tons of electricity) is needed.**

Kittycoin has implemented an innovative new cryptocurrency mining method dubbed “Proof of User Activity”. Using this method anyone can successfully mine for kittycoins using just their Home PC. There is no need for specialized and expensive mining equipment.

To mine all one has to do is; download the kittycoin mining software and begin watching videos and or searching the web. 20% of the total kittycoin supply is paid out to individuals who participate in the “coin mining process”.

- **Kittycoin implements a “Proof of Donation” coin distribution model to encourage individuals to donate money to support selected user voted upon charities & causes.**

In addition to 10% of the Kittycoin Token supply being distributed directly to user voted upon animal shelters and rescues, an additional 5% of the token supply is distributed to support “Proof of Donation” campaigns.

With a “Proof of Donation” campaign, individuals will be rewarded free Kittycoin Tokens in exchange for donating money (Dollars, Euros, Yen, Bitcoin, Ethereum, etc) or their time to select user voted upon charities and causes.

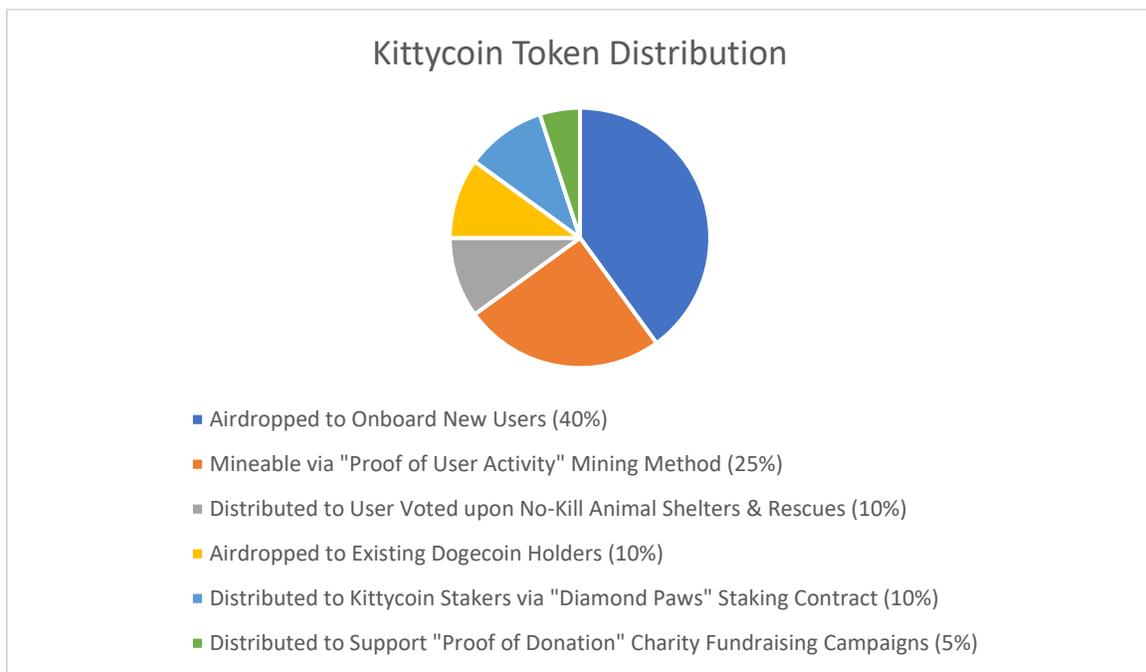

The goal of “Proof of Donation” is to create an incentivized reward system network to encourage individuals to be more generous and donate their money and time to help others in need.

Kittycoin is the future, the only question is; Will you be part of it?

Tokenomics of the Kittycoin Token:

Max Supply: 750,000,000,000,000 KITTYCOIN

BEP-20 Token & Smart Contracts – Binance Smart Chain Network

40% of Supply – Airdropped to onboard new users

25% of Supply – Mineable via “Proof of User Activity” mining method

10% of Supply – Distributed to User Voted upon No-Kill Animal Shelters
& Rescues

10% of Supply – Distributed to Kittycoin Stakers via “Diamond Paws”
Staking Contract

10% of Supply – Airdropped to Existing Dogecoin Token Holders

5% of Supply – Distributed to support “Proof of Donation” charity fundraising campaigns

Roadmap:

4/1/2021 - Kittycoin Testnet Launched

5/15/2020 - Kittycoin Official Scheduled Launch Date

(Website, Wallets, Token, Videos)

June 2021 – Scheduled launch of dogecoin airdrop snapshot and distribution. Enable all existing dogecoin holders to be eligible to claim free kittycoin airdrop tokens.

June 2021 - Scheduled Launch of Decentralized Kittycoin Blockchain Based Voting System Utilizing Smart Contracts

(Enable Kittycoin token holders to vote for the 10% charity rewards distribution)

June 2021 - Scheduled Launch of Kittycoin “Diamond Paws” Staking System

July 2021 – Scheduled Launch of Kittycoin Phone App for Mining

August 2021 - Scheduled Launch Kittycoin Freelancer Network enabling users to earn Kittycoins by completing jobs online

December 2021 - Milestone Goal 1 Million+ Kittycoin Token Users
